

FOOD INSECURITY AMONG MIDWESTERN UNIVERSITY STUDENTS LIVING OFF CAMPUS

AMY ILLOVSKY

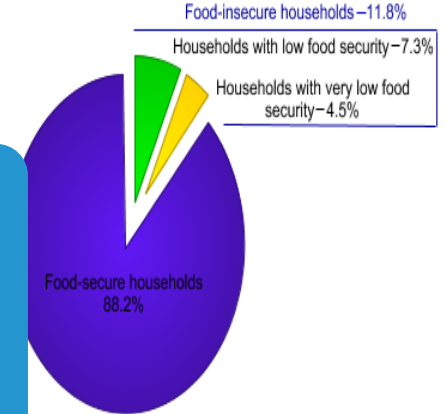

INTRODUCTION

Purpose

Identify the level of food insecurity among students living off campus to determine if there is need for an intervention

U.S. households by food security status, 2017

Source: USDA, Economic Research Service, using data from the December 2017 Current Population Survey Food Security Supplement.

Question 1

What is the prevalence of food insecurity in students living off campus?

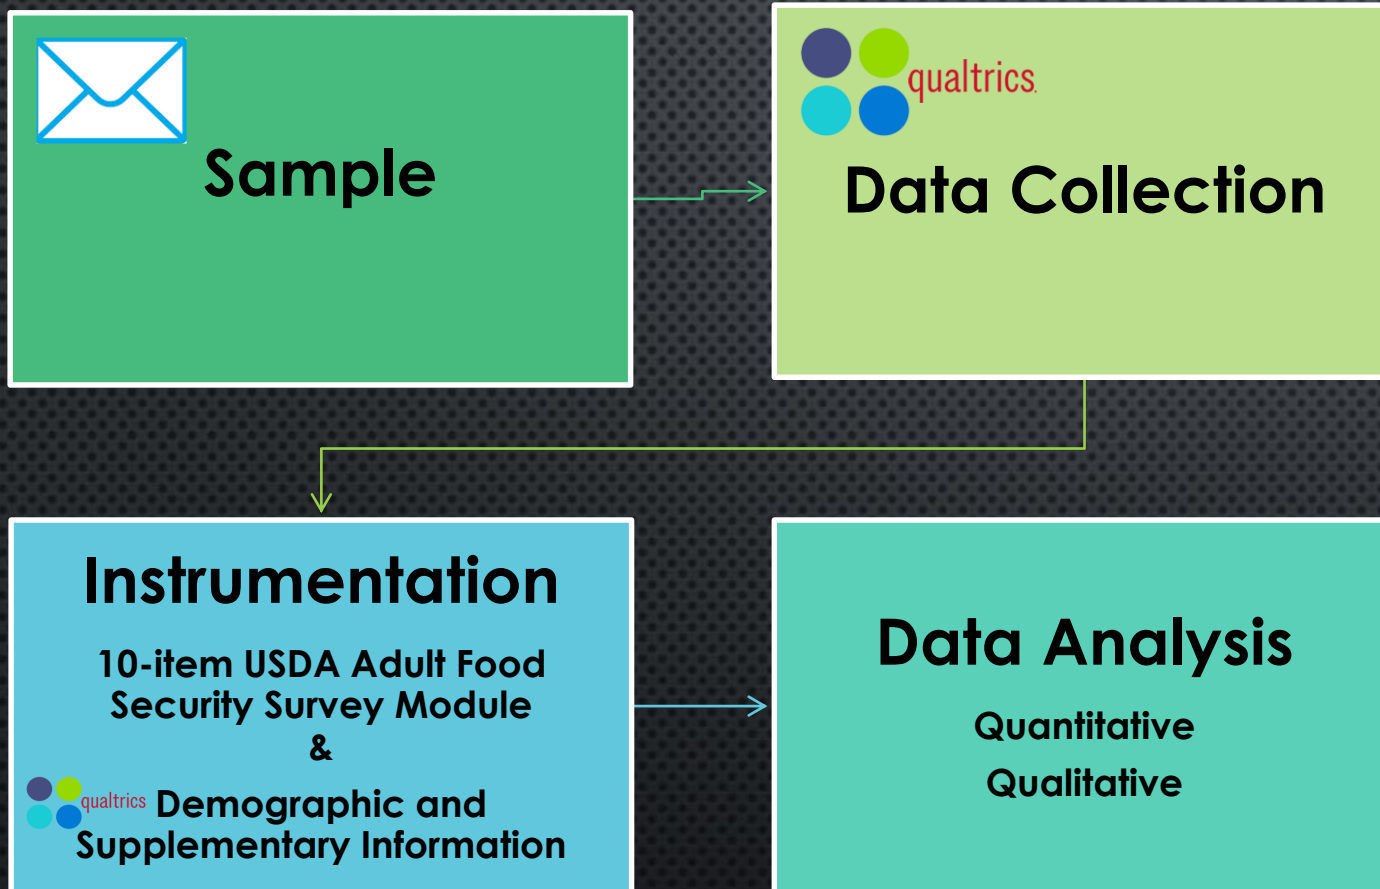

Question 2

Which variables are associated with food insecurity?

METHODS

- **SAMPLE**
 - Students from a large midwestern university
- **DATA COLLECTION**
 - Anonymous surveys via Qualtrics link
 - Informed consent
 - Criteria: live off campus
- **INSTRUMENTATION**
 - Qualtrics
 - USDA Food Security Survey Module

Table 1

Module Scores that Determine Level of Food Security

Raw Score	Food security category	Food security status
0	High food security	Food-secure
1-2	Marginal food security	
3-5	Low food security	Food-insecure
6-10	Very low food security	

- **Demographic & supplementary information**
- **DATA ANALYSIS**
 - **Quantitative:**
 - Descriptive statistics
 - Independent t-tests
 - **Qualitative:**

FUTURE RESEARCH

- Obtain more qualitative data
- Conduct studies across more colleges and universities targeted towards the students living off campus
- Continue to explore food insecurity-related variables
- Research effectiveness of interventions

DISCUSSION

Due to the high percentage of food insecurity among midwestern university students living off-campus (41%), it can be concluded that this population is in need of an intervention to address this issue.
